

Statistics & Probability for Computer Science

⇒ Links or use with other fields:-

- Data Science &
- Machine learning
- Simulations
- Robotics
- Engineering

Note :- We are using Python in this course

⇒ Table of Contents :-

- Statistics:-

- Definitions

- Types and presentation of data
- Measures of central tendency & dispersion
- Curve fitting

- Probability:-

- Basics (sets, definitions, laws)
- Counting
- Random variables
- Distributions
- Misc (joint probabilities etc)

- Applications:-

- Monte carlo simulations
- Markov chains

- Machine Learning:-

- spam detection.
- Robot localization.

from lecture 2 to 6 it is Descriptive Statistics, from 7 to onward it is inferential statistics and probability.
